

Receiving three-Dimensiona/By) Scene Descriptions. Perform computations on the three dimensional descriptions for a computer system having a real-time three-dimension renderer. Encode the optimized 3D descriptions in a 3D protocol. Transfer the encoded 3D descriptions via a physical infrastructure to the computer system. Render the 3D descriptions
by the real-time 3D
renderer of the computer
system. Display the images rendered on a display. ~ 55 F16.2
